PETITION SUBMITTED UNDER 37 C.F.R. 1.10

Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

In response to the notice to file missing parts mailed on April 26, 2002 indicating a missing declaration, applicant would like to respectfully point out that a copy of a properly executed declaration was submitted with the above-identified continuation application at the time of filing on February 13, 2002.

Applicants submit herewith a copy of the Notice to File Missing Parts.

Petition 1.10
S.N. 10/075,706

-2-

Applicants also submit herewith a copy of the properly executed declaration.

Applicants also submit herewith the Declaration of Thomas F. Lebens (hereinafter referred to as the Lebens declaration) and supporting Exhibits A-C as evidence indicating that the declaration was in fact deposited in the United States Patent and Trademark Office on February 13, 2002. Thomas F. Lebens is the attorney who filed the present application.¹

As shown in the Lebens declaration and the Express Mail Mailing Label of Exhibit A, Applicants properly deposited the nonprovisional application papers, including the properly executed declaration, with the United States postal Service by "Express Mail Post office to Addressee" in accordance with 37 C.F.R. § 1.10 on February 13, 2002.²

The MPEP states that "a postcard receipt which itemizes and properly identifies the items which are being filed serves as *prima facie* evidence of receipt in the USPTO of all the items listed thereon on the date stamped thereon by the USPTO."³ Additionally, the MPEP

¹Lebens declaration, paragraph 3

²Lebens declaration, paragraphs 4-9 and Exhibit A

³MPEP § 503

Petition 1.10
S.N. 10/075,706

-3-

states that "if a new application is being filed, all parts of the application being submitted should be separately listed on the postcard, e.g., the number of pages of specification (including written description, claims and abstract), number of claims, number of sheets of drawings, number of pages of oath/declaration."⁴ Furthermore, the person receiving the item(s) in the USPTO will check the listing on the postcard against the items(s) being filed to be sure they are properly identified and that all the items listed on the postcard are presently being submitted to the USPTO.⁵ If any items listed on the postcard are not being submitted to the USPTO, those items will be crossed off and the postcard initialed by the person receiving the items.⁶

As provided in the attached Declaration of Thomas F. Lebens and the Return Receipt Postcard of Exhibit B, Applicants' Return Receipt Postcard clearly identified all parts of the application and accompanying documents (e.g. the declaration) in accordance with the exact suggestion provided in MPEP § 503, i.e., identifying the number of pages of specification (including written

description, claims and abstract), number of claims, number of sheets of drawings, and number of pages of oath/declaration.⁷ The postcard of Exhibit B clearly identifies that the declaration was included in the submitted documents.⁸

As is clearly shown, the copy of the Return Receipt Postcard is date stamped February 13, 2002.⁹ Furthermore, no items listed the Return Receipt Postcard are crossed off and initialed by the person receiving the submission in the USPTO.¹⁰

Therefore, in accordance with MPEP § 503, the Return Receipt Postcard of Exhibit B establishes *prima facie* evidence that the declaration was in fact deposited in the USPTO with the nonprovisional application on February 13, 2002.

Additionally, the declaration of Thomas F. Lebens outlines his standard procedure used for filing a nonprovisional application in the USPTO. This standard practice includes (1) counting the number of pages of the specification confirming that all pages are included and

in proper sequence¹¹ to verify the information listed on the transmittal prior to signing the transmittal and (2) counting all of the claims of the application to verify the information listed on the transmittal prior to signing the transmittal¹². The Utility Patent Application Transmittal of Exhibit C and the transmittal filed in the present application indicate that a declaration was submitted.¹³

This standard practice also includes (3) counting all of the pages of the parts of the filing (including the number of pages of the specification) and comparing to that stated on the Return Receipt Postcard prior to initialing the Return Receipt Postcard¹⁴, (4) attaching the written description, drawings and Declaration/Power of Attorney together¹⁵ and (5) recounting the attached papers again verifying that the number of pages matches that indicated on the Return Receipt Postcard before the

papers are placed and sealed in the Express mail envelope¹⁶.

Mr. Lebens has followed this practice since at least prior to the beginning of 2001.¹⁷ Therefore, based upon his standard practice and his detailed manner, Mr. Lebens is certain that the declaration was included with the nonprovisional application papers deposited with the United States Patent & Trademark Office on February 13, 2002.¹⁸

CONCLUSION

Therefore, based upon the Return Receipt Postcard returned from the USPTO and the detailed standard practice of the attorney who filed the present application, Applicants have shown above that the declaration was in fact deposited with the United States Patent & Trademark Office on February 13, 2002. Thus, Applicants respectfully request and hereby petition that the Notice to File Missing Parts is hereby withdrawn.
